Home Interior Inspiration

Founded in 2006 with advanced Korean manufacturing technology, Poly Frame has grown into one of the region's leading producers of polystyrene wall panels, skirtings, and decorative mouldings.

At Poly Frame, we craft high-performance decorative wall solutions designed for modern spaces and global markets. With advanced manufacturing technology and premium polymer materials, our wall panels and mouldings offer exceptional durability, water resistance, and precise detailing.

Each product is engineered to meet international quality standards, ensuring long-lasting beauty, easy installation, and consistent performance in diverse climates.

As a trusted partner for architects, distributors, and construction companies across the region, Poly Frame delivers reliable supply, innovative designs, and professional service—making us a preferred choice for projects seeking both aesthetics and technical excellence.

Technical Specifications

Polyframe products are manufactured from high-quality polystyrene (PS), a lightweight yet durable polymer known for its dimensional stability and moisture resistance. Unlike MDF, polystyrene does not absorb humidity, swell, or deform, and compared to PVC, it contains no chlorine-based compounds and maintains superior thermal stability without releasing harmful emissions. This makes PS a reliable, clean, and globally compliant material for modern interior applications.

All Polyframe profiles are finished with premium, first-grade decorative foils available in exclusive colors and textures. These advanced laminates are scratch-resistant, impact-resistant, and fade-resistant, ensuring long-term visual quality and surface durability far beyond standard PVC or MDF solutions. The combination of engineered polystyrene and high-performance foils delivers a next-generation decorative product trusted by designers, builders, and distributors across diverse markets.

LONG SHELF LIFE

EASY INSTALLATION

WATER RESISTANT

THERMAL AND COLD INSULATION

RESISTANT TO CORROSIVE

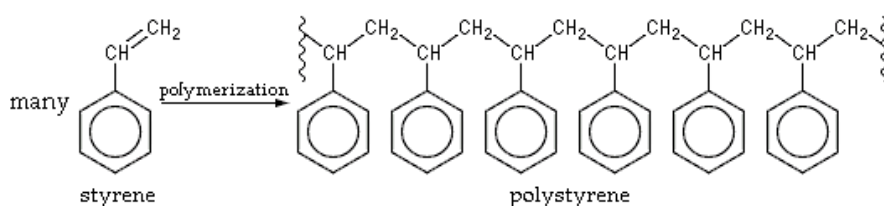

ANTI-BACTERIAL

EASY TO WASH & CLEAN

INSECT RESISTANT

Thermomodern

The Thermomodern Series by Poly Frame combines modern aesthetics with advanced PS engineering. Its precise fluted design enhances contemporary interiors, from residential spaces to commercial projects, while allowing optional light lines or decorative inserts within the grooves. Durable, versatile, and easy to install, Thermomodern delivers a premium architectural finish suitable for a wide range of design styles.

Ideal for lobby feature walls, TV background walls, upscale retail façades, and modern corridor paneling.

Paya

The Paya Series by Poly Frame is a minimalist square-profile PS moulding designed for use as skirting, wall paneling, or framing in modern interiors. With its slim 14 mm height and two width options, it brings clean lines and subtle architectural structure to residential and commercial spaces. Its versatile color range integrates easily into both neutral and bold design styles, offering a refined and durable decorative solution.

Designed for clean wall-floor transitions, minimalist framing accents, boutique interiors, and refined architectural detailing.
